

## BLUE HEAVEN HEADPHONE CABLE

Personal audio has taken the industry by storm. Whether you are a personal audio aficionado, using your headphones as an introduction to hi-fi sound, a mobile or desktop solution for your listening needs, or as an “any hour” option in order to enjoy your main system without disturbing the rest of your household or neighbors, there is no denying that headphones are the new staple in any music enthusiast’s rig. But just like all audio components, they need a solid foundation to achieve their full performance potential. Nordost’s Blue Heaven Headphone Cable is a profound improvement over the sub-standard, detachable wire provided with many headphones, elevating the listening experience to new heights.

The Blue Heaven Headphone Cable offers a unique combination of technological innovation, pliability and strength to make the best interface for mid to high level headphones. Nordost uses 34 AWG 7/42 conductors, which are twisted into a Litz construction, increasing flexibility, eliminating triboelectric noise within the cable and improving upon its mechanical damping. Our proprietary Micro Mono-Filament technology is then applied, which involves individually wrapping each conductor with a strand of FEP before being encased in extruded FEP insulation, drastically improving the cable’s dielectric.

Unlike many other cables, which are typically plugged in and left alone, a headphone cable is constantly being changed out,

moved around and pulled on—durability matters. In order to accommodate the added demands on our headphone cables, Nordost has included an Aramid fiber strength member to the construction of this cable. Aramid fibers serve a dual purpose. Not only do they ensure the mechanical integrity of the cable, transferring the strain away from the conductors, but the resonating properties of Aramid fibers also enhance sound quality.

The Blue Heaven Headphone Cable is terminated with a 3.5mm stereo mini plug and is provided with a threaded 3.5mm to 6.3mm(1/4in) stereo phono adapter that easily and securely screws onto the original termination. Due to the various terminations available, the Blue Heaven Headphone Cable is compatible with many different players in the headphone market.

- 34 AWG 7/42 Litz Wire Construction
- Micro Mono-Filament technology
- Low dielectric FEP insulation
- Gold plated contact points
- Handcrafted in the USA
